

EDUCATION

Universidade Estácio de Sá	Jan 2024 - Feb 2028
B.E. Software Engineering	Overall GPA: 8/10
Applied Mathematics, Discrete Mathematics, Algorithms, Databases, Machine Learning, Artificial Intelligence, Natural Language	

EXPERIENCE

DaynamoAI	Remote
Senior Software Engineer (Contract)	Jan 2024 - Present
- Designed and implemented an interactive dashboard utilizing D3 and visx libraries, providing users with a comprehensive tool for evaluating prompts across various metrics. - Engineered a CQRS-based system on the backend using Nest.js enabling asynchronous generation of prompts and enhancing system scalability and maintainability. - Implemented model loading utilizing LoRa, optimizing the efficiency and performance of the application machine learning components. - Spearheaded engineering efforts related to AWS Marketplace and Sagemaker integration, facilitating seamless deployment and management of machine learning models. - Streamlined deployment processes using Pulumi, contributing to more efficient and reliable deployment pipeline, including the development of a full self-serve deployment solution. - Played a key role in addressing security vulnerabilities (CVEs), reducing their count from 609 to 2 through diligent analysis and proactive mitigation measures. - Developed agentic-evaluation framework using foundation open-source models.	
Union.ai	Remote
Senior Fullstack Engineer	Jan 2023 - Jan 2024
Worked on Flyte and Union Cloud Console, a performant workflow orchestration platform that seamlessly unifies data, ML and analytic stacks written in Go, Python and React.
